PROJECT PART 2

Team: Matthew Sredojevic, Robert Ladd, Hannie Ngo

Title: ElectronXchange

<u>Project Summary:</u> A web application served as an online marketplace for people interested in buying electronics.

Main Features

- Customers can create an account
- Customers can browse and see a list of electronics
- Customers can add their account information (payment information, shipping address, etc.)
- Customers can add product to their shopping carts
- ♣ Customers can buy products from the market
- ♣ Customers receive confirmation email whenever they finish a transaction
- Admins can log on the system
- ♣ Admins can customize inventory (add, view, delete, update)

Stretch Functionality

- The ability for users to rate products
- ♣ A way for providers to implement API's from their own product based websites

Project Requirements:

Business Requirements

ID	Requirements	Topic Area	Actor	Priority
BR-1	Catalogs of products are categorized based on hardware, condition, etc.	Inventory Management	Admins	High
BR-2	User account must be email format and free of cost	Account Service	Customers	High
BR-3	Advanced product search facility with preferences and filters	Inventory Management	Customers	Medium
BR-4	Notification email of transactions should be sent within 5 minutes	Account Service	Customers	Medium
BR-5	Shopping cart will be invalidated after a day	Processing	Customers	Low

User Requirements

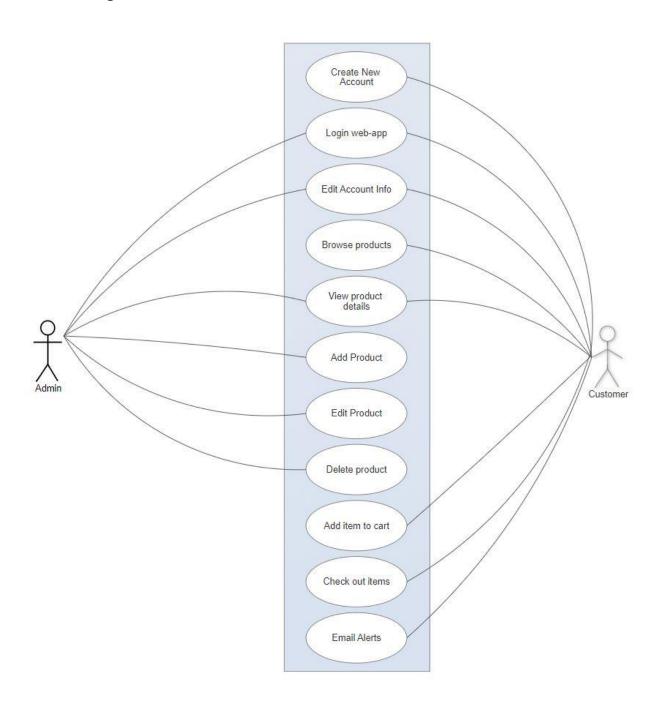

ID	Requirements	Topic Area	Actor	Priority
UR- 01	As a user, I want to be able to create an account	Account Service	Customers	High
UR- 02	As a user, I want to be able to log in to my account	Account Service	All	High
UR- 03	As a user, I want to be able to browse certain types of electronics with a search filter	Processing	Customers	Medium
UR- 04	As a user, I want to be able to view product detail information	Inventory Management	All	High
UR- 05	As a user, I want to add product to the inventory	Inventory Management	Admins	High
UR- 06	As a user, I want to edit product information	Inventory Management	Admins	High

UR- 07	As a user, I want to remove product from the inventory	Inventory Management	Admins	High
UR- 08	As a user, I want to add products of interests to my shopping cart	Suggestion	Customers	High
UR- 09	As a user, I want to confirm buying products from the shopping cart	Account Service	Customers	High
UR- 10	As a user, I want to edit my account information including shipping address and payment information	Account Service	Customers	High
UR- 11	As a user, I want an email notification for every exchange I have made	Account Service	Customers	High

Non-functional Requirements

ID	Requirements	Topic Area	Actor	Priority
NFR-01	Password security authentication	Security	All	High
NFR-02	Users shall receive notification of profile changes via email	Security	Customers	Medium
NFR-03	Product information and wish-lists will be stored in database	Storage	Admins	High
NFR-04	Searching engine must be dynamically updated and run fast	Performance	All	Low
NFR-05	Credit card information must be kept private	Security	Customers	Medium

Use Case ID	UC-03			
Use Case Name	Browse and view products			
Description		stomers will be able to browse certain arch filter and see a grid layout of produ		
Actors	Cu	stomers		
Pre-conditions	Unregistered/registered customers get access to the main page of the web-app			
Post-conditions	Customers are able to see lists of products they potentially want to exchange			
Frequency of Use	Fre	quently throughout the day		
Flow of Events		Actor Action	System Response	
	1	Fill in the search bar with filters/preferences, click "Search"	Loading inventory from database and update view	
	2	Modify the search bar or preferences Choose quantity of product displays per page	Update view	
Variations	None			
Exceptions	The searching result can be generated based on titles, manufacturers, product descriptions.			
Developer Notes	Hannie Ngo			

Use Case ID	UC-04		
Use Case Name	View product details		
Description	Admins and customers when clicked to a certain item will be able to view product detail		
Actors	All (admins and customers)		
Pre-conditions	Admins have to log in, navigate to either their inventory page Registered/unregistered customers are on the search result page		
Post-conditions	Admins/customers could view product details		
Frequency of Use	Often		
Flow of Events	Actor Action System Response		
	1 Click on specific item of the list Direct users to the product detail page with input parameter being the product ID Update view displaying all information of a certain product		
Variations	Generated views are different for admins/customers. For admins: grid layout with customizations For customers: single page layout with fixed features		
Exceptions	None		
Developer Notes	Hannie Ngo		

Use Case ID	UC-05
Use Case Name	Add products
Description	Admins can add new products to the inventory
Actors	Admins
Pre-conditions	Admins have to log in and navigate to the inventory page

Post-conditions	Admins can add the new product to their inventory and are able to view the updated list		
Frequency of Use	Oft	en	
Flow of Events		Actor Action	System Response
	1	Access to the inventory page	Load available products that are currently available in data storage
	2	Click "Add new product"	Navigate to a new page, inquiring admins to fill in product information
	3	Fill in all product information including name, model, condition, etc., click "Confirm and Add"	Update database Reload view
Variations	None		
Exceptions	None		
Developer Notes	Hannie Ngo		

Use Case ID	UC-06
Use Case Name	Edit product
Description	Admins can edit information of products in the inventory
Actors	Admins
Pre-conditions	Admins have to log in, navigate to their inventory page
Post-conditions	Admins are able to view the list with their updated products
Frequency of Use	Often

Flow of Events		Actor Action	System Response
	1	Access to the inventory page	Load available products that are currently available in data storage
	2	Choose specific product Click "Edit new product"	Navigate to a page already filled with details which are open for customizations
	3	Edit product information including name, model, condition, etc., click "Confirm and Update"	Update database Reload view
Variations	No	ne	
Exceptions	None		
Developer Notes	Ма	tthew Sredojevic	

Use Case ID	UC-07		
Use Case Name	Delete product		
Description	Admins can delete a single product or a list of products in the inventory		
Actors	Admins		
Pre-conditions	Admins have to log in, navigate to their inventory page		
Post-conditions	Selected product(s) are deleted from their list and admins are able to view the updated list		
Frequency of Use	Often		

Flow of Events		Actor Action	System Response
	1	Access to the inventory page	Load available products that are currently in data storage
	2	Choose one or more product that they would like to delete, click "Delete"	Update database Reload the view
Variations	None		
Exceptions	None		
Developer Notes	Hannie Ngo		

Use Case ID	UC-08	
Use Case Name	Add items to shopping cart	
Description	Registered customers will be able to add products of interests to their shopping cart	
Actors	Customers	
Pre-conditions	Customers have to log in, navigate to their inventory page	
Post-conditions	Selected products added to the shopping cart and customers are able to view the current cart	
Frequency of Use	Often	

Flow of Events		Actor Action	System Response
	1	On the inventory page, for their favorite products, click "Add to shopping cart"	Update items and quantities in shopping cart
	2	Modify quantity of product the customer would like to purchase	
	3	Click "Check out" or "Continue shopping"	Direct customers to payment page or back to the inventory page
Variations	None		
Exceptions	None		
Developer Notes	Hannie Ngo		

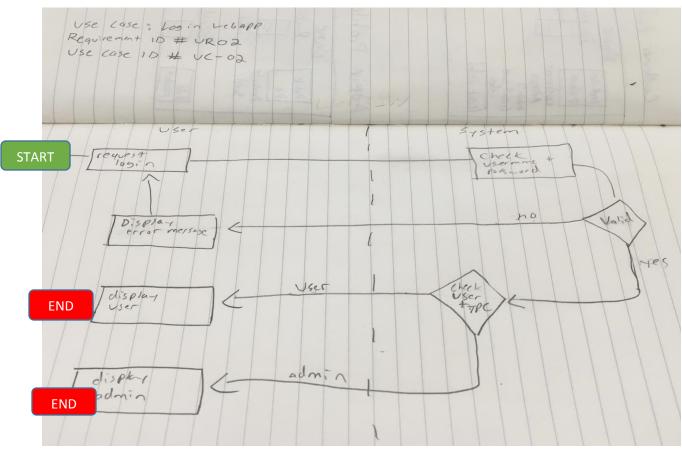

Use Case ID	UC-09			
Use Case Name	Check out and confirm buying			
Description	Cus	Customers can check out their shopping cart and confirm payment		
Actors	Cus	stomers		
Pre-conditions	Customers have to log in, navigate to the shopping cart, making sure of their selections and want to pay for them			
Post-conditions	Customers are done with transactions and receive confirmation email			
Frequency of Use	Often			
Flow of Events		Actor Action	System Response	
	1	Click "Check out"	Update current view of the shopping cart	
	2	Click "Confirm payment"	Reload view Update database Send email confirmation	
	3	Receive email alerts		

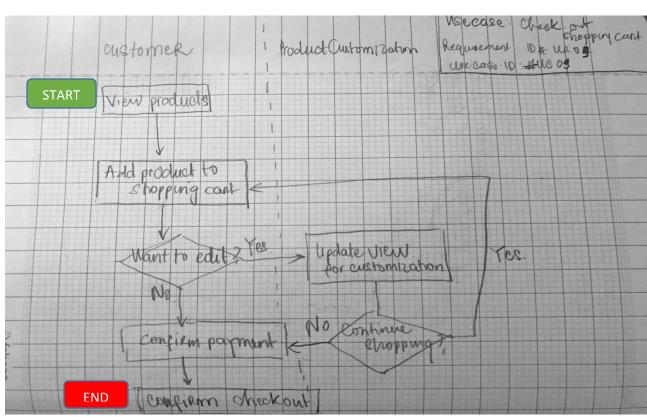

Variations	On the checkout page, customers can either go back to "Continue to Shopping" or proceed with "Confirm payment"		
Exceptions	None		
Developer Notes	Robert Ladd		

Use Case ID	UC-10			
Use Case Name	Edit account profile			
Description		Customers are able to edit account profile including payment information and shipping address		
Actors	Cu	Customers		
Pre-conditions		Customers are already registered and would like to maybe add/change credit card information and shipping addresses		
Post-conditions	Cu	Customers' profiles get updated for future transaction		
Frequency of Use	Often			
Flow of Events		Actor Action	System Response	
	1	Click on "My account"	Reload view with current information loaded from database	
	2	Customize such features as shipping address, credit card information Click "Confirm"	Update database Direct back to the main page	
Variations	None			
Exceptions	None			
Developer Notes	Hannie Ngo			

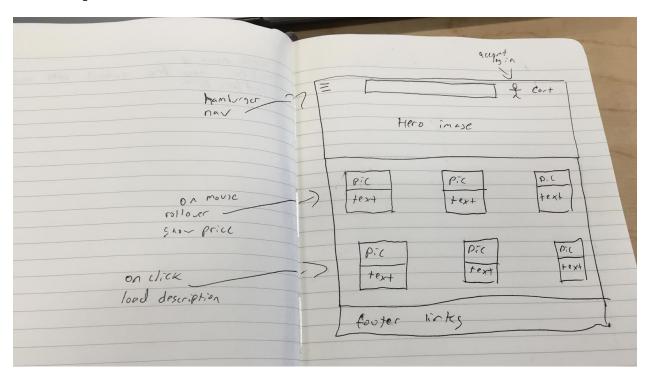

Use Case ID	UC-11			
Use Case Name	Email alerts			
Description	When a customer successfully perform a transaction, email confirmation will be sent			
Actors	Cu	stomers		
Pre-conditions	Cu	Customers have to finish a transaction/exchange		
Post-conditions	Both will receive email alerts within 5 minutes			
Frequency of Use	Often			
Flow of Events		Actor Action	System Response	
	1		Send email alerts to the buying party Update the inventory database after the product get purchased Reset shopping cart	
	2	Receive email alerts See default shopping cart		
Variations	None			
Exceptions	None			
Developer Notes	Robert Ladd
